

# TRENCH SHORING COMPANY'S SAFETY RAIL SYSTEMS

World Class On-the-job  
Protection for Workers

In the potentially hazardous construction industry Trench Shoring Company's line of OSHA-approved Safety Rail Systems help prevent serious injury or death from falls.

**RailGuard 200 Safety Rail** is the original non-penetrating safety guard rail system.

- Modular design available in lengths from 2 to 13.5 feet
- Basic kits include (1) rail, (1) base and (2) pins
- Individual components may be added for custom safety guard rail applications

**Trench Shoring Company On Guard Rail System** modular Guard Rail System.

- Modular design comes in standard lengths of 4 ft., 5 ft., 6 and 8 ft.
- This allows versatility when setting up a Guard Rail System for any size excavation.

**Trench Safety Anchor** is a safer solution compared to conventional lifelines that workers might attach to any temporary anchoring point.

- The Trench Safety Anchor post has a rotating upper head with opening to mount a retractable safety line.
- This system can easily be moved around the job site with a piece of equipment as work progresses.

"Commitment To Safety & Service"  
Since 1973

Providing same day service from all our locations to Southern California, San Leandro/Bay Area, Bakersfield, Fresno, the San Joaquin Valley and the Las Vegas, Nevada areas.

# SAFETY RAIL SYSTEMS

## RailGuard 200 Safety Rail

The RailGuard 200 is the original non-penetrating safety guard rail system that exceeds requirements for OSHA temporary and permanent guard rail standards. It is ideal for creating leading edge rooftop fall prevention or for defining material landing zones during active work on the job site.

## Trench Shoring Company On Guard Rail System

A modular Guard Rail System is a modular Guard Rail System that exceeds requirements for OSHA temporary guard rail standards. The System creates leading edge fall prevention around trenching and excavation work when installed on shoring panels.

## Trench Safety Anchor

The Trench Safety Anchor is a safety line anchor post that is mounted to a trench plate, thus securing a retractable safety line for trench workers. Often, these workers are required to wear full life-line harnesses attached to shock absorption or fall protection when working at different elevations. The Trench Safety Anchor is a safer solution compared to conventional lifelines that workers might attach to any temporary anchoring point such as a hook on a backhoe. If a temporary anchoring point is moved without informing the worker, serious injury may occur.

## PROVIDING SAME DAY SERVICE FROM ALL OUR LOCATIONS

### Compton • Corporate Office

206 N. Central Ave.  
Compton, CA 90220  
(310) 327-5554
