OSHA ENHANCED NATIONWIDE ENFORCEMENT 22 Workers Have Perished in the First Half of 2022

In the first six months of 2022, 22 people have fallen victim to the deadly hazards present in trenching and excavation work, compared to 15 in all of 2021. These fatalities have prompted the U.S. Department of Labor's Occupational Safety and Health Administration to launch enhanced enforcement initiatives to protect workers from known industry hazards. In keeping with its National Emphasis Program for excavations, OSHA compliance officers will perform more than 1,000 trench inspections nationwide where they may inspect any excavation site.

As a company that provides trench shoring safety equipment, teaches trench safety classes, and whose President is the current President of the North American Excavation Shoring Association, we are very concerned with the rise of trench related fatalities. Our customer services associates and sales staff are asked questions frequently about equipment, job site conditions and workable solutions that will keep your employees safe.

Our purpose is to promote safe and efficient use of excavation shoring practices. Please do not be a statistic. Ask us about how you can make your people safe in the trenches with the right products or sign up for a trench safety training class. **Call 310-327-5554 or visit us online at www.trenchshoring.com**

ABOUT TRENCH SHORING COMPANY

Whether it's for a current project - or your next project - Trench Shoring Company should be your 1st choice for shoring equipment, trench safety training and service. We have consistently handled our customer's toughest jobs - with safety, service and customer satisfaction – since our start in 1973.

We know every job is different. Our expert consultants are here to help guide your project, train your teams, and ensure your shoring equipment needs are met – starting with offering 13 standard and custom sizes of steel trench plates, as well as Trench Shields™, Hydraulic Shoring, Slide Rail and additional underground safety equipment.

PRESIDENT'S MESSAGE

Trench Shoring Company President Kevin Malloy is the 2022 President of North American Excavation Shoring Association (NAXSA). NAXSA was created to promote the safe and efficient use of excavation shoring practices and represents the professions in the shoring industry—from manufacturers, engineers and rental companies to distributors, suppliers and government agencies, all of whom share the common goal of maintaining safety in the excavation shoring industry. NAXSA is joining the OSHA Alliance Program to share information about OSHA's initiatives and compliance assistance resources.

"I am extremely proud of the team and company we have created. I am equally proud that safety is the core of everything we do and remains our number one priority. With our strong culture of safety, we continue to provide outstanding service to our customers while keeping them and ourselves safe. Our safety culture is deeply rooted in our overall business strategy, and we are committed to providing necessary resources, support and training toward ensuring each and every employee returns home safely at the end of the day."

PRODUCT SPOTLIGHT: MORE THAN JUST SHORING

Once an excavation is opened, a potential fall hazard may have been created at the top of the trench. That's why we provide an extensive line of fall protection gear to keep you and your employees safe, in and around an excavation. Ask your Shoring Consultant for a copy of our Fall Protection brochure.
