### Flex-Shield Features

- Designed to work in conjunction with the excavator to increase production in all types of soil
- Thinner side panels to minimize repaving and restoration costs
- Units available in varying load carrying capacities, heights, widths and lengths to suit user needs
- Meets O.S.H.A. requirements
- Can be utilized for pipe laying, jacking pits, setting vaults, retrofit work and many other applications
- The largest inventory in the area

### Manhole Box Features

- Units available 8' or 10' square, in varying heights
- Can be used for a variety of applications, including building manholes, emergency repairs and retrieving soil samples.

## The Versatility You Need!

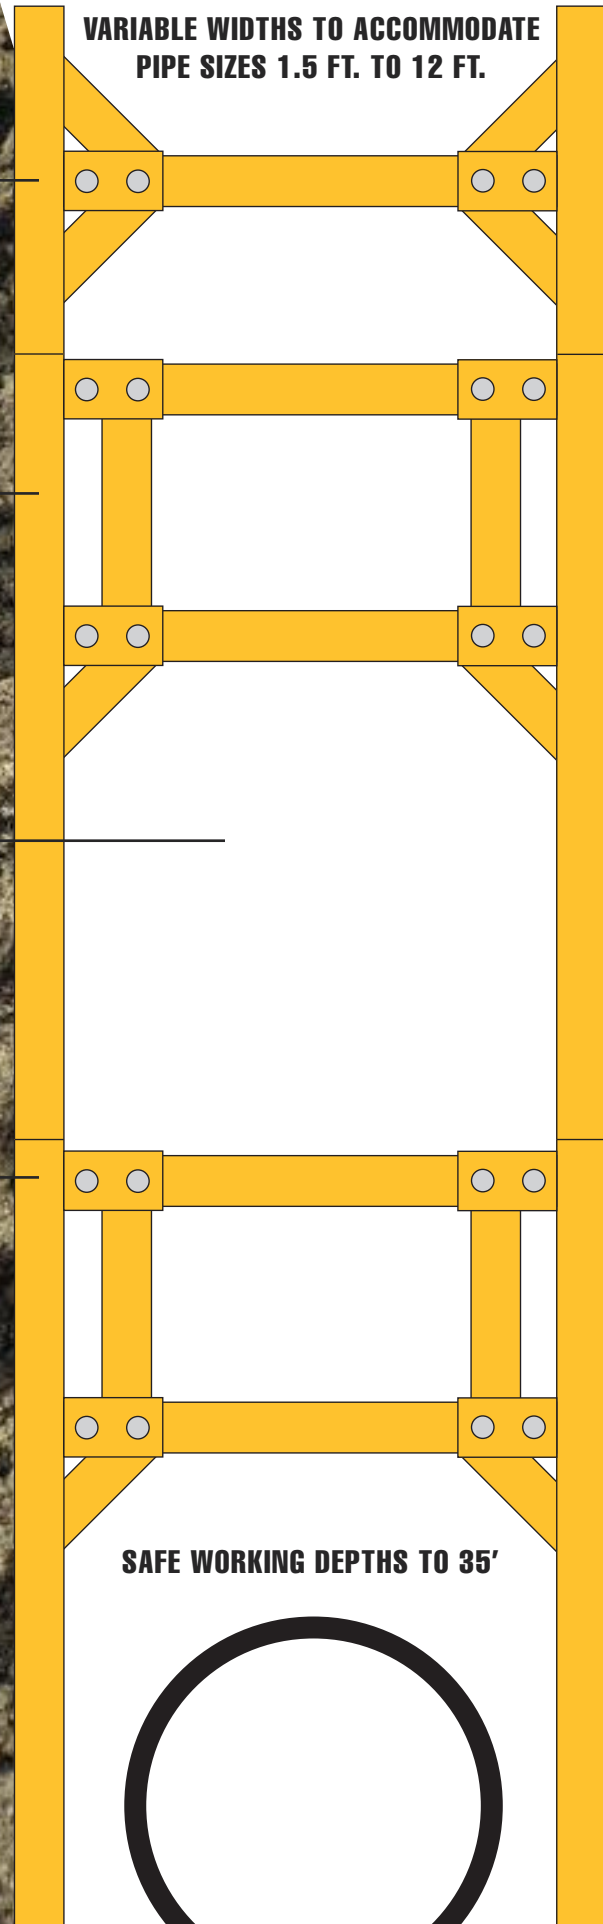

The power of choice! Trench Shoring Company gives it to you with more types of shields than anyone else in the area! And—they all meet or exceed O.S.H.A. requirements. That means you get safe, lightweight, and compact shoring equipment alternatives throughout your entire job.

You'll have the assurance that your next shoring job will go quickly, smoothly, and easily with Trench Shoring Company Flex-Shields.

## The Availability You Require

From a small utility trench to a 10-mile sewer line—Trench Shoring Company has the equipment you require to get the job done quickly and easily—or we'll custom design it for you.

Trench Shoring Company's exclusive Flex-Shield Trench Boxes and Manhole Boxes are available for sale or rental.

## **The Service You Want**

Super service. You demand it—and we deliver it—consistently!

Same day service is offered to the Southern California and Las Vegas areas with radio-dispatched boom trucks delivering equipment right to your job site. Trench Shoring Company's operators do all unloading, set-up and loading to keep your workers and machinery productive.

## **NUCA Competent Person Training**

Trench Shoring Company provides competent person training seminars. The seminars cover CAL-O.S.H.A. Title 8, section 1540 through 1541.1 requirements pertaining to excavations, trenching and sloping techniques, productive systems and soils classification with an introduction to confined space safety.

## **NUCA Confined Space Entry Training**

This program, "Confined Space Entry" is intended to provide managers, foremen, competent persons, and workers with basic information regarding entry into confined spaces. It's purpose is intended to create an

awareness of the hazards associated with confined space entry, to help workers understand the procedures that must be followed when entering confined spaces, and to provide managers with basic information necessary to establish a confined space entry program.

## Differences You'll Appreciate

### You've Got Pull!

Only Trench Shoring Company's unique Flex-Shield™ trench boxes have a mid-section camber. Unlike other trench boxes that bow in the middle and are tough to pull, Flex-Shield's trench boxes are wider in the middle and the sidewalls straighten under pressure to create easy movement.

### You've Got Economy!

Flex-Shields have the narrowest possible sidewalls. That means less soil excavation, less backfill, less compaction and more savings for you! And, fast easy set-up and removal time is another major cost-cutter for you.

### You've Got Strength, Light Weight And Flexibility!

Flex-Shields offer the highest pounds per square foot (PSF) rating. Use them in the deepest trenches—safely. Their design exceeds all O.S.H.A. criteria. And, elimination of the bottom knife edge assures that they can be used in any configuration when stacked in deep trenches. Customized bottom points are available upon request.

### You've Got Engineering Excellence!

A registered Civil Engineer, working with Trench Shoring Company's underground construction specialists, designs both standard and custom Flex-Shields.

**WARNING** TRENCHING AND EXCAVATING is dangerous. All equipment furnished by Trench Shoring Company is sold and rented without warranty, expressed or implied. Equipment furnished by Trench Shoring Company meets or exceeds CAL-O.S.H.A. requirements for Trench or Excavation protection. Refer to CAL-O.S.H.A. Title 8 Section 1540—1541.1 or contact Trench Shoring Company or your closest CAL-O.S.H.A. office should you have any questions regarding proper use of trench safety equipment.

## Manhole Boxes

### You've Got Four Wall Protection

Trench Shoring Company manhole boxes are the ultimate in worker safety. Manhole boxes are available in 4', 6', and 8' heights and come either 6', 8' or 10' square. Manhole boxes are available with solid sides or cutouts at the bottom. Specially built for manhole installations, tie-ins and repair work. Manhole boxes can be stacked in combination with Trench Shoring Company Flex-Shield boxes for unique applications, providing the flexibility you need with the protection O.S.H.A. requires.
