SAFETY ZONE

MAGNETIC SAFETY TOOL

Keep Hands and Feet Clear of the Danger Zone!

Safe-T-Stik is a super strong, durable, magnetic tag line safety tool designed to keep your workforce safer when moving heavy, dangerous steel objects such as Trench Plates, Road Plates, Shoring, I-Beams, Poles, Pipe, Steel Plate or Dock Plate. Safe-T-Stik keeps workers further away from hazardous situations without sacrificing control.

The “T” handle is comprised of expertly crafted 6061 T6 aluminum and has a very unique ability to twist and lock in 90° intervals. This allows a worker to quickly adapt to different situations. A solid fiberglass rod with comfortable and durable grips gives a worker superior comfort and strength.

Safe-T-Stik has a custom super grip magnet that produces over 400 lbs of grip force and is protected in a steel casing. Its proprietary dual axis system has a unique design feature that allows the magnet to be easily released.

Helps Your Workforce Safely Move Heavy, Dangerous Steel Objects
