SLIDE RAIL SHORING SYSTEMS

Slide Rail Rolling Strut Systems

Trench Shoring Company's SBH Slide Rail Shoring systems offer highly effective solutions in areas with unfavorable ground conditions, or where existing underground infrastructures make trench support difficult. Our patented shoring systems can handle very deep and wide trenches, high clearance requirements, and will support surcharge loads from trains, soil and other required construction equipment. Additionally, using SBH Slide Rail equipment instead of traditional beam and plate or solid sheet shoring, ensures worker safety, saves the contractor money, and helps keep projects on schedule.

- Provides safety while excavating
- Tight sheeting without soil movement
- Vibration free, no damage to adjacent structures
- Saves money: Less material cost than conventional sheeting, finish in a third of the time using half the labor
- Engineered to meet O.S.H.A.

TRENCH SHORING™ COMPANY

"Commitment To Safety & Service"
Since 1973

Providing same day service from all our locations to Southern California, San Leandro/Bay Area, Sacramento, Bakersfield, Fresno, the San JoaquinValley and the Las Vegas, Nevada areas.
