TRENCH COVER

OXFORD® COMPOSITE LOWPRO® 15/10

Safe, Simple & Strong Protection

LowPro 15/10 Anti-Slide: Flexi-Edges

The anti-slide technology, on the underside and edges of the LowPro Trench Cover, is made from a soft, flexible, rubber material which grips the surface reducing unwanted movement. Rubber edges can be replaced to extend the life of your LowPro 15/10.

Lightweight - Easy 2 Person Lift Trench Cover

Unlike steel plates, the LowPro 15/10 sidewalk covers & driveway covers can be handled by 2 people. It is far easier to lift and install than steel plates as there is no need for heavy lifting equipment.

Say Goodbye to Anchors and Cold Patch

The LowPro 15/10 composite trench cover has an innovative and patented Flexi-Edge system which does not need to be anchored down or cold patched. This greatly reduces trip hazards for pedestrians and reduces installation time.

TRENCH SHORING™ COMPANY

"Commitment To Safety & Service"
Since 1973

Providing same day service from all our locations to Southern California, San Leandro/Bay Area, Sacramento, Bakersfield, Fresno, the San Joaquin Valley and the Las Vegas, Nevada areas.

LIGHTWEIGHT COMPOSITE LOWPRO® 15/10 TRENCH COVER

The LowPro 15/10 uses patented Flexi-Edge system to greatly reduce trip hazards for pedestrians and to reduce unwanted movement.

The product was commissioned by National Grid UK to design a cover to support a load of one wheel of a 7,716 lb. vehicle, over a 36" span, & to use the LowPro technology. In most site configurations the product will not need to be fixed in place which reduces installation time and reduce costs of reinstatement, reducing the need to use steel plates in driveway applications.

The increased loading and design also enables the product to be used in pedestrian applications that require a span up to 47.25". The new design, developed in collaboration with Utilities and Contractors, alike, provides a single product that works in multiple applications.

Cover a Length of Trench with the Infill Strip

The **Infill Strip** completes the LowPro Trench Cover system: use to connect several trench covers in a line to prevent drifting. The Infill Strip has the added benefit of removing trip hazards between LowPro Trench Covers. Available in a small and large size depending on the orientation of the trench cover over the trench.

Features:

- Two Person Lift
- Saves Time and Money
- More stable than traditional trench covers thanks to its PVC anti slip edge and higher load rating
- Lighter than steel trench plates making it easier to maneuver and transport for driveway applications
- Inner yellow section section made from glass reinforced composite
- Very stable without anchoring (Does not need to be fixed in most applications)
- Can be anchored, if site conditions are required
- Covers 47.25" trench for pedestrian traffic up to 882 lbs
- Gas Vents and Probe hole designed into product
- Enables access & mobility for pedestrians & vehicles: Suitable for foot traffic and wheelchairs
- Shock Resistant

Product Specifications	
Length	59"
Width	39.3"
Weight	105.8 lbs

Allowable Trench Span (Per Cover)	
Pedestrian Crossing Only (Up to 882 lbs.)	47.25"
