Description

Diamondback® single tunnel systems provide protection for valuable cable and hose lines while ensuring a safe method of passage for vehicles. High-density, all-weather urethane construction protects from damage by physical pressure and reduces cable and hose maintenance and replacement costs. The single tunnel systems feature a high load-bearing capacity, modular, interlocking design, and diamond-plate tread surface for increased traction with hoses and cables up to 3" in diameter.

Custom cable protectors can be made with different colors and embossed logos. **Get a quote with your specific requirements**.
