Clamp-On Davit

Self-Standing Davit

FALL PROTECTION EQUIPMENT

In the potentially hazardous construction industry Trench Shoring Company's line of OSHA-approved Fall Protection equipment helps prevent serious injury or death from falls.

Trench Shoring Company Guard Rail System

Our modular Guard Rail System exceeds requirements for OSHA temporary guard rail standards. The system creates leading edge fall prevention around trenching and excavation work when installed on shoring panels.

Clamp-On and Self-Standing Davit

Our davit systems are portable and easily set-up, they can also be transported from one location to another. Ideal for confined space entry and emergency rescue applications, and can accommodate a variety of winches and fall arrest devices. Our davit systems are loaded with features such as locking legs, simple detent pin style adjustment, quick-mount mechanical device bracket, safety chain to prevent movement and safety shoes that incorporate a rubber sole for flat surfaces and spiked edges for slippery surfaces.

FALL PROTECTION EQUIPMENT

RailGuard 200 Safety Rail

The RailGuard 200 is the original non-penetrating safety guard rail system that exceeds requirements for OSHA temporary and permanent guard rail standards. It is ideal for creating leading edge rooftop fall prevention or for defining material landing zones during active work on the job site.

RailGuard 200

Trench Safety Anchor

The Trench Safety Anchor is a safety line anchor post that is mounted to a 8' x 12' x 1" steel trench plate, thus securing a retractable safety line for trench workers. Often, these workers are required to wear full life-line harnesses attached to shock absorption or fall protection when working at different elevations. The Trench Safety Anchor is a safer solution compared to conventional lifelines that workers might attach to any temporary anchoring point such as a hook on a backhoe.

Safety Anchor

Ladder Safe Platform

The lightweight Platform from GME is designed to allow easy and safe access to the excavation. Featuring an expandable ladder post and ladder clamps that securely fasten the ladder at the correct angle, enabling a safe side entry to the ladder. Featuring a swing through door, a ladder arm and security chain, the Platform offers a complete system for accessing a sheet pile or Trench Shield and Slide Rail excavation.
